Information on the FCC Form 854 is maintained in the Commission's System of Records, FCC/WTB-1, "Wireless Services Licensing Records." These licensee records are publicly available and routinely used in accordance of subsection b of the Privacy Act, 5 U.S.C. 552a(b), as amended. Taxpayer Identification Numbers (TINs) and materials that are afforded confidential treatment pursuant to a request made under 47 CFR 0.459 of the Commission's rules will not be available for public inspection.

Nature and Extent of Confidentiality: Respondents may request materials or information submitted to the Commission be withheld from public inspection under 47 CFR 0.459 of the Commission's rules.

The Commission has in place the following policy and procedures for records retention and disposal: Records will be actively maintained as long as the entity remains a tower owner. Paper records will be archived after being keyed or scanned into the

Antenna Structure Registration (ASR) database and destroyed when twelve (12) years old.

Needs and Uses: As discussed below, the Commission is revising the FCC Form 854 to implement measures adopted in a recent Report and Order, and is seeking Office of Management and Budget (OMB) approval for this information collection as revised. The Commission is also reporting a change in the annual burden and annual cost due to a small increase in the number of responses. After the comment period, the Commission will submit the revised information collection to OMB to obtain the full three year clearance.

The purpose of the FCC Form 854 is to register antenna structures (radio towers) that are used for communication services regulated by the Commission; to make changes to existing antenna structure registrations or pending applications for registration; or to notify the Commission of the completion of construction or dismantlement of such structures, as required by Title 47 of the Code of Federal Regulations (CFR), chapter 1. In addition, for proposed new antenna structures, the FCC Form 854 is used to facilitate a pre-application public notification process, including a required 30-day period of local and national notice to provide members of the public with a meaningful opportunity to comment on the environmental effects of proposed antenna structures that require registration with the Commission.

The Commission is revising this current information collection due to the adoption of a Report and Order, FCC 14-117, which streamlined and eliminated outdated provisions of the Commission's part 17 rules governing the construction, marking, and lighting of antenna structures. The changes to this collection are necessary to implement

two of the updates adopted in the Report and Order. The first change, to section 17.4(j), requires owners of certain antenna structures to file FCC Form 854 with the Commission if there is any change or correction in the overall height of one foot or greater or in the coordinates of one second or greater in longitude or latitude of a registered antenna structure. The second change, to section 17.4(b), requires owners to note on FCC Form 854 that the registration is voluntary, if the antenna structure is otherwise not required to be registered under section 17.4.

As a result, there will be a small increase in the number of FCC Form 854s filed each year, as well as an additional question added to the form itself which will permit qualified applicants to indicate that they are voluntarily registering their antenna structures. These changes will enable the Commission to further modernize its rules while adhering to its statutory responsibility to prevent antenna structures from being hazards to air navigation.
